**BITUMEN EMULSION SPRAYER ABS-8000**

Bitumen Emulsion Sprayer ABS-8000 – is the optimal equipment for performing large volumes of work in the shortest possible time. Autonomous diesel engine makes it possible to install the equipment on any truck. The elements of control are located on a separate panel in the driver's cab with partial redundancy in the control cabinet, which facilitates the adjustment of equipment and the transition of its working bodies from the transport to the working position. High quality bitumen pump and shut-off valves ensure trouble-free operation of the equipment.

- Circulation of bitumen in the tank and distributor.
- Heating bitumen in the tank to working temperature with Ecoflam diesel burners (Italy).
- Bitumen pouring onto the prepared road surface.
- Bitumen pouring through a manual distributor when patching repairs and filling cracks.
- Autonomous diesel engine (Italy) + generator.
- Victor pumps (Italy) (capacity: 250-300 l. / min).
- Standalone system for heating horizontal asphalt pipes (electric).
- Three-sectional spraying bus with the ability to work separately for each section (hydraulic control-sliding).  
Spraying width – from 2 m to 3.7 m;
- Automatic dosing of bitumen emulsion on the control unit from the driver's cabin (g / m<sup>2</sup>), as well as manual (proportional) control. Density of surface coating – from 100 g/m<sup>2</sup> to 1600 g/m<sup>2</sup>;
- Hydraulics (European manufacturer).
- Diesel burner - Ecoflam MAX20 (Italy).
- Control of the system - from the driver's cab (touch screen display).
- Tanks of 8 m<sup>3</sup>.
- Compressor Metabo.( or analogue)
- Rear-view camera with a monitor (from the driver's cabin).
- Pneumatic taps control.
- Motor blowing and washing system.
- Integrated system for heating emulsion from the socket.
- Circulation of bitumen material in the tank.
- Mechanical emulsion level indicator in the tank.
- Insulated cistern.
- Hand spraying rod with spool.

Price\*: ~~48900~~ **44055** euro netto on a frame (without vehicles)
